

COON CREEK
WATERSHED DISTRICT

MPLS/St. Paul Source
Water Assessment
September 10, 2026

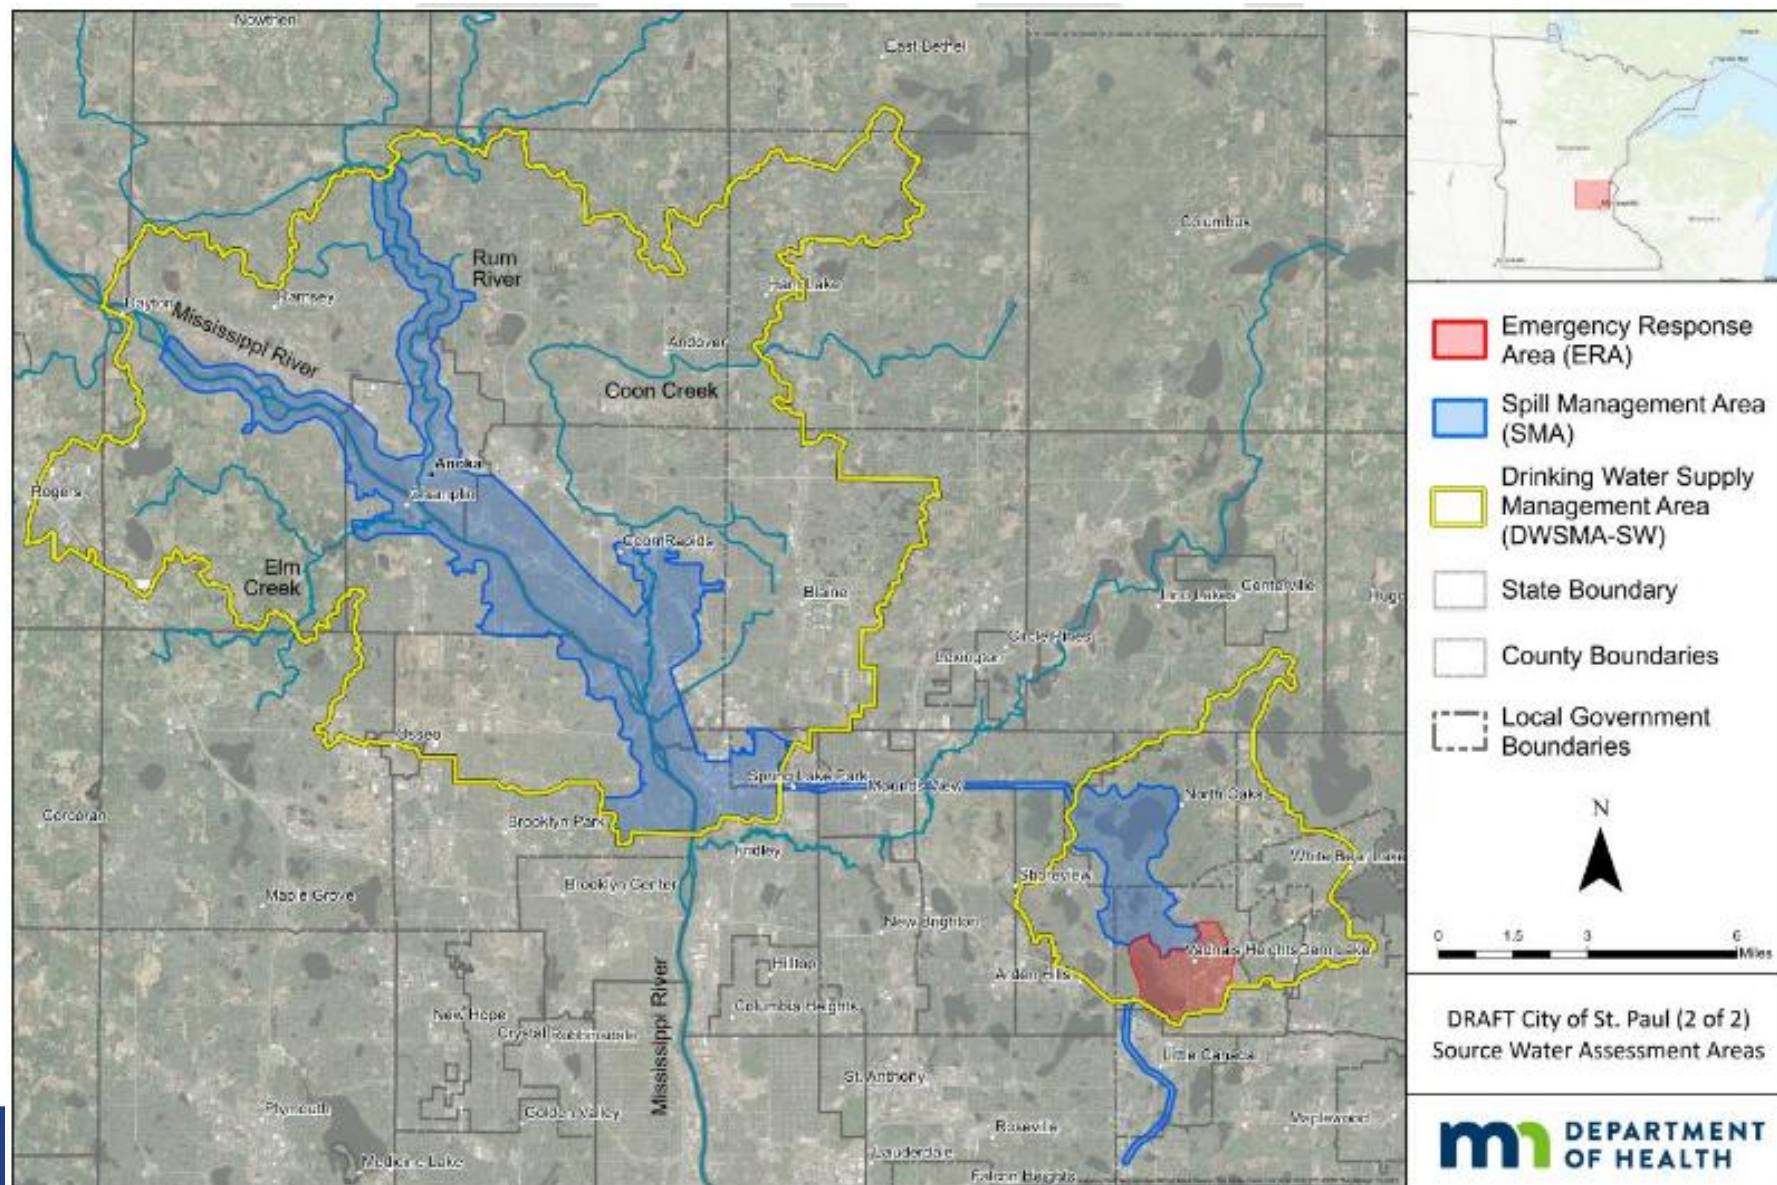

What is it?

- MDH completed draft Source Water Assessments for Minneapolis and St. Paul to assess current drinking water contribution areas, ID potential contamination sources, and provide recommendations to protect and improve drinking water supply.
- Comments on draft SWAs are due **October 9th**.
- The SWA will be finalized and used to draft the Surface Water Intake Protection Plan (SWIPP).

Report Summary

- ✓ Emerging risk contaminants: Nutrients, Cl, TSS, E.coli, cyanobacteria, CECs
- ✓ High priority point sources: FMC Corp Superfund, BNSF Northtown Railyard, several Coon Rapids and Fridley storm interceptor outfalls, Coon Rapids dam, Monticello Nuclear Plant
- ✓ Emergency preparedness and collaboration
