Coon Creek Watershed District Activities, Facilities and Day to Day Business Changes

Last Updated: 3/17/2020

The Coon Creek Watershed District is actively engaged with the Minnesota Department of Health (MDH) and other local partners following the Centers for Disease Control (CDC) protocols with regard to the COVID-19 virus.

The CDC and MDH have robust websites that contain the most up to date information on COVID-19.

- CDC Website
- MDH Website

Coon Creek Watershed District COVID-19 Preparedness

The Coon Creek Watershed District’s first priority is the safety of residents, vendors, customers, and employees. To that end, the District is aligning with the CDC and MDH guidelines pertaining to COVID-19.

Following the lead of Governor Walz’s peace time state of emergency declaration on Friday, March 13 and his decision to close schools until the end of March, we are “opening the tool box” to make decisions rapidly.

The following changes will be implemented effective immediately.

Day to Day Business at District Facilities

The District office and service counter is closed to the public. Residents are encouraged to call or e-mail the District at either 763-755-0975 or info@cooncreekwd.org if they have water resources based issues or concerns. District employees will be accessible although many are working remotely.

District Sponsored Outreach Activities and Appearances

All activities taking place at District facilities or run or attended by District staff scheduled from now until April 15 are cancelled. This will be reevaluated after April 15. District facilities include:

- Office
- Clean ups
- Advisory committee meetings
- Public workshops

Site & Wetland Inspections

While most construction has been halted during the winter months, the apparent early spring may necessitate drive-by inspections.
Ongoing Updates

These steps are being taken to quickly mitigate the spread of COVID-19. The District will be assessing these changes and updating preparedness measures as needed. Please check the District’s website often for the most current updates.
