COON CREEK WATERSHED DISTRICT
Request for Board Action

MEETING DATE: June 13, 2016
AGENDA NUMBER: 10
ITEM: Public Workshop on Stormwater Pollution Prevention Plan

POLICY IMPACT: Policy
FISCAL IMPACT: Budgeted

REQUEST
Hold public meeting to review District performance in stormwater and comprehensive water management.

Receive comments from the public.

BACKGROUND
In 2003 the Coon Creek Watershed District was designated a Municipal Separate Storm Sewer System (MS4) under the Federal Clean Water Act by the Pollution Control Agency. The designation relates to the District’s responsibilities for the public ditch system and our role in the conveyance and management of stormwater.

As an MS4, the District is required to establish several programs (Minimum Control Measures or MCMs) and conduct activities consistent with the Clean Water Act, the State Non-Point Discharge Elimination Permit (NPDES) and the District’s own Storm Water Pollution Prevention Plan (SWPP)

The NPDES permit also requires the District to advertise and conduct an annual public meeting to review the District’s activities consistent with the Permit and implementation of the SWPP. An Annual Reports is also required and due to PCA by June 30 of each year. The approval of the Annual Report is scheduled for the June 20 Board meeting.

ISSUES/CORENRS
1. **Public Meeting Notice**: Notice of the Public Workshop was posted in the official newspapers of the District May 13, 20, 27 and June 3, 2016 and on the CCWD website since May 12th, 2016.

2. **Agenda**: Below is an agenda for the review. The agenda can be accompanied by a Power Point presentation by staff.
   1. Background – MS4 Designation
   2. Resource Condition
   3. Program Activities (Minimum Control Measures)
      a. Public Education and Outreach
      b. Public Participation/Involvement
c. Illicit Discharge Detection and Elimination  
d. Construction Site Runoff Control  
e. Post-Construction Runoff Control  
f. Pollution Prevention/Good Housekeeping

4. Future Activities
5. Public Comment

**RECOMMENDATION**
1. Hold public meeting to review District performance in stormwater and comprehensive water management.

2. Receive comments from the public.
