BACKGROUND
At the January 13, 2020 Board meeting the Board awarded a contract to Sunram Construction Inc to construct the Middle Sand Creek Corridor Restoration project.

On January 22, 2020 a preconstruction conference was held onsite to review the project details and construction schedule.

CURRENT SITUATION:
Notice to proceed: expected to be issued on January 24, 2020. Contractor provided all required permits and submittals.

Schedule: Phase 1- Tree removal to begin week of January 27, 2020 and continue through mid-February. Earth work and bank treatments will begin end-January/early-February and continue through the end of March. The site will be seeded and allowed to revegetate over the summer. Phase 2 will resume in fall 2020 to complete the earth work and bank treatments and continue into spring 2021. The site will then be restored with seeding and plantings. Invasive species and vegetation maintenance will continue through 2023.

Tree removal: trees have been tagged and painted for removal. Material will be stockpiled onsite

Signage: contact information and project details have been posted throughout the project site in areas where the public may gain access to the site.

Project oversight: staff will be onsite daily through the initial portion of the project. Weekly progress meetings have been scheduled so that all involved parties have an opportunity to be onsite at least weekly as needed.
