COON CREEK WATERSHED DISTRICT
PERMIT REVIEW

MEETING DATE: January 28, 2019
AGENDA NUMBER: 14
FILE NUMBER: 19-025
ITEM: Nelson Park

RECOMMENDATION: Approve with 2 Stipulations

APPLICANT: City of Coon Rapids
11155 Robinson Drive
Coon Rapids, MN 55433

PURPOSE: Mill and overlay 160 LF of trail and basketball court

LOCATION: Nelson Park, Coon Rapids MN

APPLICABILITY:
1. High infiltration soils
EXHIBITS:
1. Project Narrative and Figure; by City of Coon Rapids, undated, received 1/11/2019.

PREVIOUS ACTION TAKEN: This is a new application.
FINDINGS:
Pre-application Meeting: The project as submitted has not received a general review during a pre-application meeting.

Ditches: There is not a public ditch on the property.

Ditch Hydraulics: A crossing of the ditch is not proposed.

Erosion and Sediment Control: Soils affected by the proposal are Isanti and Markey. SWPPP will be provided.
   • Stabilizing vegetation is proposed for disturbed areas within seven (7) days of rough grading.
   • Soil stockpiles are not anticipated as part of the project.
   • Adjacent properties and stormwater ponds are not protected from sediment deposition. Double row of perimeter control at waterbodies/creeks/wetlands not provided.
   • Construction schedules detailing when sediment trapping measures will occur; stabilization of earthen structures and the general timing of construction phases have not been provided.
   • Stabilization adequate to prevent erosion has not been provided at the outlets of all storm sewer pipes.
   • All storm sewer inlets are not protected from sediment-laden water during construction.
   • All work adjacent to water or related resource has not taken precautions to contain sediment, and stabilize the work area during construction.
   • Provisions have not been made to minimize transport of sediment (mud) by runoff or vehicle racking onto the paved surface.
   • Provisions have not been made for cleaning road surfaces where sediment is transported by the end of the day.
   • Construction entrance points are not clearly located on the erosion and sediment control plan.
   • The erosion and sediment control plan does not provide for the repair and maintenance of all temporary and permanent erosion and sediment control practices.
   • Details of ESC provided (riprap, perimeter control, concrete washout, inlet protection, etc.)

Dewatering: Shallow ground water does may exist on site. The project may require dewatering.

Floodplain: There is no floodplain on the property according to the District model and FEMA.

High Water Flooding: Information has not been provided and is not needed, no structures proposed.
**Groundwater:** Geotechnical has not been provided and is not needed, no structures or infiltration practices proposed.

The project site is within the 10 Year Well Head Protection Area/Drinking Water Supply Management Area.

The proposal does not contain a land use discouraged or prohibited by the Safe Drinking Water Supply Act (SDSA).

**Historic Sites:** The proposed project does not include sites of historic or archeological significance.

**Local Planning & Zoning:** The proposed project is consistent with local planning and zoning. There is an approved local water plan.

**Maintenance:** No Stormwater Management features or treatment practices are proposed as part of the project.

Easements: The proposed project does not include ditch maintenance easement. A ditch maintenance easement is not required.

**Stormwater & Hydrology:** Infiltration is allowed within the project area. The 1-inch infiltration is achieved via overland flow.

Drainage sensitive uses do not exist downstream from the proposed site. The rate of post-development runoff from the site does not exceed predevelopment rates, or rates which would interfere with sensitive downstream land uses. No increase in the volume, velocity and peak water flow rates of stormwater runoff expected as part of the project. Concentrated storm water leaving a site is discharged directly into a well-defined natural or man-made off-site receiving channel or pipe. No on-site conveyance channels are proposed as part of the project.

**Water Quality:** The proposed project does not cause an exceedance of State water quality standards. The project does not contribute to the adverse impact of wetlands through inundation or volume of flow. All work adjacent to wetlands, waterbodies and water conveyance systems are protected from erosion. The proposal will not detrimentally affect the existing water quality of the receiving water. The proposal will not cause extreme fluctuations of water levels or temperature changes.

**Impairments:** This project is not within one (1) mile of and drains to an Impaired Water.

**Wetlands:** Wetlands do not exist on-site according to the 1987 Federal manual, NWI, PWI and Soil Survey. Wetlands have not been delineated
Wetland Replacement Plan: A wetland replacement plan has not been submitted and is not required

Wildlife: The proposed project does not include endangered or threatened species, rare natural communities, colonial waterbird nesting sites, migratory waterfowl concentration areas, deer wintering areas or wildlife travel corridors. The applicant has not contacted the MDNR natural heritage or endangered species program and is not required to.

If the project is present, the project does not propose substantial adverse alteration or significant detrimental impact on a species or removal of a plant species.

Performance Escrow: $2,090
Wetland Escrow: $ N/A
There are not ditch liens on the property.

ISSUES/CONCERNS:

<table>
<thead>
<tr>
<th>ISSUE</th>
<th>NEED</th>
</tr>
</thead>
<tbody>
<tr>
<td>Escrows: $2,000 + (0.18 ac * $500/ac) = $2,090</td>
<td>1. Receipt of escrows.</td>
</tr>
<tr>
<td>Soils &amp; Erosion Control: Narrative states a SWPPP will be developed for the project.</td>
<td>2. Provide SWPPP prior to construction activities. Include figure with ESC items shown and ensure items in ESC section above are addressed as needed for the project.</td>
</tr>
</tbody>
</table>

RECOMMENDATION: Approve with 2 Stipulations

Stipulations:
1. Receipt of escrows.
2. Provide SWPPP prior to construction activities. Include figure with ESC items shown and ensure items in ESC above are addressed as needed.
