COON CREEK WATERSHED DISTRICT
Request for Board Action

MEETING DATE: October 14, 2013
AGENDA NUMBER: 9
ITEM: Request to Seek bids on Woodcrest Pond at US Hwy 10

FISCAL IMPACT: $123,043
POLICY IMPACT: Policy

REQUEST
Direct staff to seek bids for project

BACKGROUND
In 2010 the Anoka Conservation District prepared the Woodcrest Subwatershed Stormwater Retrofit Assessment. A City of Coon Rapids owned area east of Hwy 10 and north of Woodcrest Creek was identified as a potential area to construct a stormwater pond.

On May 29, 2012 the Board reviewed potential program and project initiatives including the Woodcrest HWY 10 Pond.

At the September 10, 2012 Board meeting the Board budgeted $123,043 for the design (5,000) and construction ($118,043) of the Woodcrest HWY 10 Pond.

In May 2013 CCWD staff conducted a site survey and collected soil samples for sieve and nutrient analysis.

On July 22, 2013 the Board authorized staff to seek quotes for the Woodcrest HWY 10 Pond. Since this authorization there has been significant changes in scope and location.

ISSUES/CONCERNS

RECOMMENDATION
Re-authorize staff to seek bids from pre-qualified contractors
DESCRIPTION
There is a large unused space east of Highway 10 and just downstream of the Woodcrest stabilization project completed in 2010. The property is within a park owned by Coon Rapids, and the area is classified as an M3 (manage 3) wetland by the city (ID# 24-8). This category is reserved for areas that provide the highest functions of water quality protection and flood attenuation. Woodcrest Creek flows through the wetland area before entering the culvert under Highway 10. Currently there are no stormwater treatment practices at this location.
