

Dispose of Pet Medication Properly!

Proper Disposal

Take-Back Box

Local police departments or pharmacies may have these- ask them about hours & restrictions

Take-Back Events

As part of a national campaign, local police departments may host weekend take backs twice every year in the spring and fall

Improper Disposal

Household Storage

Accidental ingestion or medication abuse can happen if expired or unneeded medicine is left at home

Toilet

Flushed drugs can end up in our water because wastewater treatment plants can't always full remove them

Pet meds & human meds normally can be disposed of the same way! Most take-back sites will accept both- check in first, and see what restrictions they might have. You can look up take-back sites and events on the Drug Enforcement Agency's website.
