1. Reporting Requirements

About the Performance Report and Plan

The Coon Creek Watershed District (District) is required to annually report on a variety of activities. These requirements and the state and federal laws that mandate the reporting are listed here.

Watershed Act

The Minnesota Watershed Act (M.S. 103D.351) requires the District to prepare a yearly report of

- The financial conditions of the District
- The status of all projects
- The business transacted by the District
- Other matters affecting the interests of the District
- The District plans for the succeeding year

Metropolitan Water Management Act

The Metropolitan Water Management Act (M.S. 103B.231) requires a yearly report similar to the Watershed Act but stipulates specific financial and activity items to be reported.

- Roster and contact information for the Board and Advisory Committees
- Various financial expenditure information
- Permit and enforcement activity
- Annual plan
- Status of local plan adoption
- Summary of monitoring data
- Status of wetland banking

Federal Clean Water Act

The National Pollution Discharge Elimination System (NPDES) Program requires all MS4s to file an annual report of specific activities related to the Minimum Control Measures (MCMs) identified in the District Storm Water Pollution Prevention Plan (SWPPP).

Wetland Conservation Act

The Minnesota Wetland Conservation Act (M.S. 103A) requires the Board of Water and Soil Resources to report to the legislature on various activities related to the implementation of the Act. All LGUs that receive funding through the Natural Resource Block Grant (NRBG) program administered by BWSR are required to report on:

- The number of WCA applications
- Replacement plans
- Size of wetland impacts and losses
- Use of credits for replacement
- Exemption determinations
- Replacement wetlands
- Enforcement actions
- Administrative and technical training

{Intentionally Blank}

2. Coon Creek Watershed District At a Glance

Introduction

The Coon Creek Watershed District (District) was created in 1959. The Watershed encompasses 94 square miles of the northern edge of the Twin Cities Metropolitan Area and is located entirely within Anoka County. The Watershed Act (103D) and the Metropolitan Water Management Act (103B) provide the most basic authorities for the District. In 1990 the District Board adopted a mission statement to guide District programs and activities:

Mission

To manage groundwater and the surface water drainage system to prevent property damage, maintain hydrologic balance, and protect water quality for the safety and enjoyment of citizens, and preserve and enhance wildlife habitat.

Organizational Structure

A Board of Managers administers the District. The Board is composed of five members representing different geographic areas of the District. Each Manager

- Serves a three-year term, staggered
- Is nominated by his or her local unit of government
- Is appointed by the Anoka County Board.

The watershed Board is statutorily authorized to employ professional assistants in carrying out its duties. The Board and staff provide leadership on a watershed-wide basis. Watershed-wide policy and direction are formulated and provided for field implementation through District and Municipal activities.

The current organizational structure is shown on the next page.

Coon Creek Watershed District Organizational Structure Research Professional Water Resource Professional Forester District Administrator **Board of Managers** District Planner Technical Advisory Committee Citizen Advisory Committee Engineer Trapper Attorney

District Business Model

As the lead agency in the watershed for water resource management, the Coon Creek Watershed District provides leadership in the protection, management, and use of water and related land resources.

The watershed uses a multiple-use land management approach to pursue eleven statutory goals (pp.67-94). To implement its mission and pursue the legislative goals, the Coon Creek Watershed District operates six programs and strategies:

- 1. Administration
- 2. Development Regulations and Issue Management
- 3. Operations and Maintenance
- 4. Planning, Programming, and Budgeting
- 5. Public and Governmental Relations
- 6. Research, Monitoring, and Data Collection

Link to District Budget

These programs are developed to provide better public service and sustainable land stewardship practices. They are also the context for budgeting and tracking District activities and tasks.

Adjustments to Comprehensive Plan

The annual goals for our 2009 Budget and Plan are based on the District Comprehensive Plan (approved by the Board of Water & Soil Resources in October 2004) and SWPPP (received by the MPCA in May 2006). Adjustments to some District objectives and outcomes are based upon more recent performance information and current and projected funding levels.

Resource Conditions

The overall condition of the water resources within the Coon Creek Watershed is Potentially Serious. Potentially Serious Resource Conditions are those requiring immediate attention because they present serious problems or because there is no known management strategy or technology for dealing with them.

A summary of the overall resource condition is provided below.

Potentially Acceptable **Resource Conditions**

Potentially Acceptable Resource Conditions are those where existing conditions and projected levels of use can be sustained with current and expected future levels of management.

Potentially Deteriorating Resource Conditions Potentially Deteriorating Resource Conditions occur when future management and technology are not expected to keep pace with demands for resource uses and/or resource conditions will deteriorate in the future.

Potentially Serious Resource Conditions Potentially Serious Resource Conditions are those requiring immediate attention because they present serious problems or because there is no known management strategy or technology for dealing with them.

3. District Program Review

Coon Creek Watershed District is managed through six programs:

- 1. Administration
- 2. Development Regulation and Issue Management
- 3. Operations and Maintenance
- 4. Planning, Programming, and Budget
- 5. Public and Governmental Relations
- 6. Research, Monitoring, and Data Collection

ADMINISTRATION

Program Description

This program implements the approved policies of the Board of Managers, administers the financial affairs of the Coon Creek Watershed District, ensures the accountability of public funds, and serves the District financial needs.

Activities and Outcomes

The Administration Program consists of six activities:

Board of Managers Training and Seminars Financial Management Records Contract and Personnel Administration Risk Management

Jim Haertel, BWSR, gives plaque honoring CCWD 50th Anniversary to Board President Byron Westlund

Board of Managers: Members, Officers, Contact Information and Terms

The District is governed by a Board of Managers. The Board is composed of five members representing different geographic areas of the District. Each Manager serves a staggered three-year term, is nominated by his or her local unit of government, and is appointed by the Anoka County Board.

| | | | | Current | |
|--------|----------|----------------|-----------|------------------|----------------|

Oath of Office

Minnesota Statute 103D.315 requires all Managers to take and Oath of Office. Each Manager is sworn in using the Oath of Office, when they are appointed. In addition, the Board re-administers the Oath of Office annually at the first Board meeting of each year.

Principle Place of Business

Minnesota Statutes 103D.321, Subd. 1 requires the District to designate a public facility within the watershed district as a principal place of business.

Meetings

The Board of Managers meets on the second and fourth Monday of each month (24 times per year). The meeting schedule is published in the Anoka County Union and on the District website (www.cooncreekwd.org). The meeting schedule is also stipulated in the District rule. Board meetings are at:

Address Bunker Hills Activity Center

550 Bunker Lake Blvd NW

Andover, MN 55304

Phone 763-757-3920 Fax 763-755-0230 In 2009 the Board met 22 times. One of those meetings (July) occurred after the down turn in the development industry and was cancelled because of lack of business for the Board. The second meeting, scheduled for the Monday after Christmas was cancelled due to a lack of business and to allow for the holiday.

| Outcome | 2008 | 2009 Forecast | 2009 Actual | 2010 Forecast | 2011 Forecast | 2012 Forecast |
|-----------------------|------|------------------|----------------|------------------|------------------|------------------|
| Number of Meetings | 22 | 23 | 22 | 22 | 22 | 22 |

Board Business

The Board of Managers reviewed and acted on 282 separate items of business in 2009. These actions were up slightly (12%) from 2008. The greatest change was seen in information (129%) and discussion items (43%) as a result of the increased emphasis on water quality.

| Outcome: | 2008 | 2009 | 2009 | 2010 | 2011 | 2012 |

Official Paper

Minnesota Statutes 103D requires that under certain circumstances, the District notice its meetings, hearings, and decisions. To meet the District goal of keeping the public informed District business is always noticed in the Anoka County Union & Shopper, Inc. (Anoka Union, Blaine Life, and Coon Rapids Herald)

Advisory Committee Appointments

M.S. 103D.331 requires that the Board of Managers annually appoint an advisory committee to advise and assist the Board on matters affecting the interests of the watershed district.

Solicitation of Interest Proposals for Service Providers

The District employs seven technical service providers. Minnesota Statutes 103B requires that the District solicit interest proposals for legal, professional, or technical consultant services before retaining the services of an attorney or consultant or extending an annual services agreement at least every two years.

Solicit interest proposals (SIP), Request Service Proposal (RFP), Review Rates (RR), Review Services (RS)

Official Depository

Minnesota Statutes 103D.351 requires the District to report its financial transactions, and Minnesota Statutes 103D.925 authorizes the District to issue warrants for payment of contracts and general expenses. To accomplish both payment, and reporting, the District must have a depository for its funds and uses the US Bank as its official depository.

Fund Equity

In the 2003 and 2004 audits, the State Auditor expressed concern about the size of the fund balances/fund equity being held by the District and recommended that:

- 1. Fund equity amounts be reviewed annually
- 2. The Board approves these designations, with acknowledgement in the Minutes.

| Implications of Recent Administrative Trends for the Management of the Watershed (2010 to 2012) | | | | | | |
|---|---|--|--|--|--|--|
| Trend | Implications | | | | | |
| Number of Meetings per | While the amount of business the Board conducts has actually | | | | | |
| Year | increased, the need to always meet twice per month has decreased | | | | | |
| Annual Audit | The amount of detail and the audit standards from the GASB have led to increased time and complexity in preparing and reporting for the annual audit. | | | | | |
| Smaller Year End Balances/ | The District has resolved its excess fund balance issue expressed by the | | | | | |
| Increased cash demands for | State Auditor. That decrease has in turn restricted the funds available to | | | | | |
| water quality and ground | respond to disasters and emergencies such as the tornado damage of | | | | | |
| water management | 2008 | | | | | |

| Expectations about the future for Administration of the Watershed | | | | | | | |
|--|--|--|--|--|--|--|--|
| Expectations | Explanation | | | | | | |
| Fewer Board Meetings with longer agendas | The District and the public can expect that the Board of Mangers will convene fewer meetings in 2010 for at least part of the year | | | | | | |
| Increased time involved in annual audit | With staffing changes and constraints at both the County and the OSA, increased time will be devoted to preparing and managing the audit | | | | | | |
| More Involved Budget | While the Board of Managers has decreased its property tax levy each of | | | | | | |
| Discussions/Increased Taxes | the last three years to address of State Auditors' concern about excess | | | | | | |
| | fund balances and to ease District impact during the downturn in the | | | | | | |
| | national and local economy, it may have over-corrected. However, any | | | | | | |
| | discussion of an over correction needs to offset by a re-evaluation of | | | | | | |
| | overall responsibilities, needs, and priorities of the watershed district. | | | | | | |

| Immediate Needs (2010 – 2011) | | | | | |

DEVELOPMENT REGULATION & ISSUE MANAGEMENT

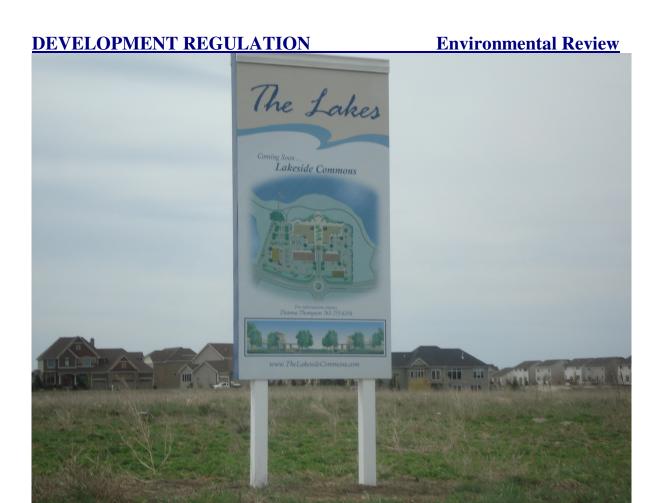

PROGRAM DESCRIPTION

The purpose of development regulation is to evaluate, permit, and monitor plans and programs affecting the water and related land resources of the District in an orderly and informed fashion.

The Development Regulation and Issue Management Program consists of five activities:

- 1. Environmental Review which includes comments on DNR and Corps of Engineers permits
- 2. Permit Inspection and Enforcement
- 3. Permit Review
- 4. Permits

This activity reviews and comments on plans, permits, assessments and studies issued by federal, state, and local units of government for the completeness, accuracy, and consistency of water resource proposals relative to District goals, objectives, and standards.

DEVELOPMENT REGULATION Permit Inspection & Enforcement

Description

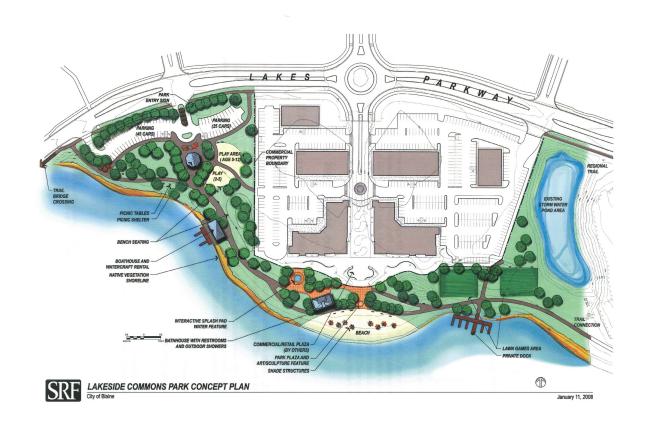

This activity ensures compliance with permit requirements and the goals, objectives and rules of the District. The activity is intended to:

- 1. Ensure that the approved plan is implemented
- 2. Provide the landowner with technical assistance as needed
- 3. Provide a means to determine if changes to the plan are necessary
- 4. Observe and document deviations from the plan as they occur

| Violation | 2008 | 2009 | 2010 | 2011 | 2012 |

| Implications of Recent | Implications of Recent Regulatory Trends for the Management of the Watershed | | | | | |
|--|--|--|--|--|--|--|
| Trend | Implications | | | | | |
| Decline in the number of Environmental Reviews | Fewer large projects requiring EAWs and fewer projects that require state permits. | | | | | |
| Increase in Issues and Complaints | More staff time will be dedicated to issue and complaint management. Particularly in the areas of compliance, water quality, wetlands and availability and maintenance. | | | | | |
| Increasing emphasis on water quality and groundwater | Analysis, planning, and review of sites for development or modification will require an increased awareness of the overall hydrology of the site, the effect of the proposal on the local hydrology and how to integrate existing hydrologic tendencies into the proposal. | | | | | |
| Decrease in the number of permit reviews/ Increase in project complexity | While the number of projects requiring a permit or review as decreased the complexity of the reviews resulting from drainage, water quality and wetland issues has increased as has the need to exercise care and provide assistance to applicants seeking approval. | | | | | |

| Expectations about the future for Regulation of the Watershed (2010 to 2012) | | | | | |
|---|--|--|--|--|--|
| Expectations | Explanation | | | | |
| Increased enforcement and preventive inspections | With the drought conditions and the development that is occurring, increased time per application can be expected. | | | | |
| Number of applications may increase slightly | There are several smaller projects that are being considered within the watershed. Their success may depend on early involvement by the watershed district in designing the stormwater system. | | | | |
| Increased complexity in review and approval | With the drought, complexity has increased with concerns about water levels and water availability. | | | | |

| Immediate Needs (2010 – 2011) | | | | | | |
|---|------------------|--|--|--|--|--|
| Need | Need Explanation | | | | | |
| Amend rules to require 1.5" of infiltration from 1" | | | | | | |
| of infiltration from 1" | | | | | | |

OPERATIONS & MAINTENANCE

PROGRAM DESCRIPTION

The purpose of the Operations and Maintenance program is the planning, design, construction and maintenance of the District ditch system and water control structures, and to preserve the location, character, and extent of the District ditch and conveyance system.

The Operations & Maintenance program consists of the following activities:

- 1. Annual Inspections
- 2. Issues & Complaints
- 3. Construction
- 4. Repair
- 5. Routine Maintenance
- 6. Demonstration Projects

Dam on Sand Creek (Ditch 41), Coon Rapids, November 2009

Structure on Ditch 58

The purpose of the annual inspection is to assess the general condition of the entire drainage system for identification of maintenance needs. Inspections vary in detail and can range from a windshield inspection of the District public drainage system to taking elevations and cross sections every 100 feet, photographing the ditch channel, and comparing to established performance standards based on functional classification of the ditch.

OPERATIONS & MAINTENANCE

Construction

Crown Point bank stabilization fall 2009

Description

This activity involves the creation of new water management facilities or the increase in capacity of existing systems. The Coon Creek Watershed District may fund Creek and ditch bank stabilization through a process involving inspection, diagnosis of cause and design of a stabilization method which gives preference to bioengineering, a determination of problem significance, and contracting work.

| Implications of Recent Operations and Maintenance Trends for the Management of the Watershed | | | | | |
|--|--|--|--|--|--|
| Trend | Implications | | | | |
| Decreased Water Availability | The increasing scarcity of water is leading to minimum or no flow situations, drops in lake elevations, and the general drying out of wetlands and ponds which serve aesthetic purposes. | | | | |
| Increased trees and potential obstructions in channel | As water levels drop or flows become variable, trees are becoming more prone to wind throw or heaving resulting in more debris in the channel. Under normal flow conditions, this material should be removed immediately. During low flow conditions downed material provides an opportunity to detain or retain water for aesthetic and fisheries purposes as well as groundwater recharge. | | | | |

| Expectations about the future Operation and Maintenance of the Watershed (2010 to 2012) | | | | | |
|---|---|--|--|--|--|
| Expectations | Explanation | | | | |
| Increased emphasis on water conservation; in channel & in use | If the drought continues, the amount and use of water appropriated both from the creek and its tributaries and the shallow aquifer connected to the creek will become an emphasis for monitoring and enforcement. | | | | |
| Increased variation in timing or removal of channel obstructions | If and when obstructions are removed may depend on the obstruction's contribution to detaining or retaining the flow of water without damaging the creek bank or structures. | | | | |

| Immediate Needs (2010 – 2011) | | | | | | |
|---|--|--|--|--|--|--|
| Need | Explanation | | | | | |
| Evaluate the potential impacts for water conservation and flooding by boarding culverts | In 2009 the District boarded culverts in four locations in Blaine. The effort appeared to have some success and if performed over a larger area could significantly contribute to recharging surficial groundwater levels. | | | | | |
| Develop a contingent obstruction removal policy | Guidance is needed for the conditions, criteria, and circumstances for timing of the removal or modification of obstructions. | | | | | |

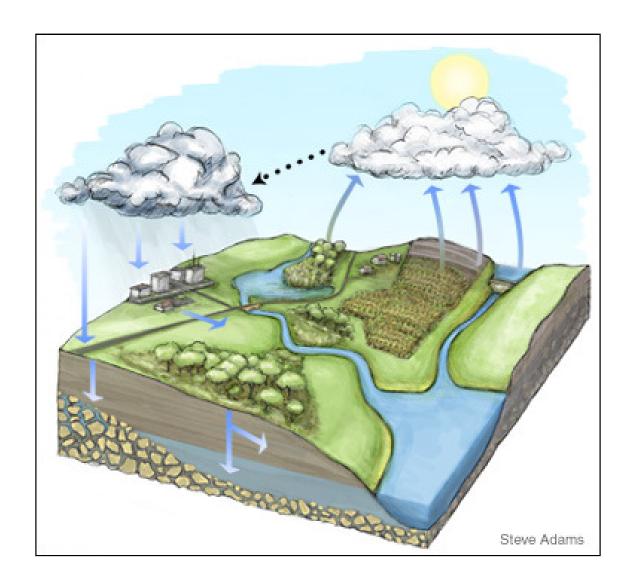

PLANNING, PROGRAMMING, & BUDGETING

PROGRAM DESCRIPTION

The purpose of the program is to coordinate the planning, prioritizing, and financing of District programs and activities.

The Planning program consists following activities:

- 1. Annual Assessment, Reporting, and Planning
- 2. Budgeting and Program Planning
- 3. Comprehensive Planning
- 4. Modeling
- 5. Policy and Procedures

PLANNING, PROGRAMMING, & BUDGETING Annual Assessment, Reporting, & Planning

Description

This activity presents basic statistics on the accomplishments and/or progress of District operations and activities in pursuing and achieving goals. It serves as the basis for accountability through quarterly objectives and through financial and program goals. Overall, the activity provides context for understanding the physical, social, and managerial trends and concerns affecting the District that may not have been anticipated in the Comprehensive Plan and the basis for accountability.

Specific tasks under this activity involve preparation of an annual report and work plan for implementing the District Comprehensive Plan approved by the BWSR and the District Storm Water Pollution Prevention Plan (SWPPP) approved by the MPCA.

PLANNING, PROGRAMMING, & BUDGETING **Budgeting & Program Planning**

Description

The budget process and resulting budget describes the programs and projects the public will fund in pursuing the District Mission.

The budget process involves 11 steps detailed in District policy which begin with adoption of a budget calendar, then a review of District strengths and weaknesses and operating environment, followed by a tour of past and potential projects, public review, and ends with a public hearing and adoption of the succeeding-year budget in September.

PLANNING, PROGRAMMING, & BUDGETING Comprehensive Planning

Description

The Comprehensive Plan takes its direction from Minnesota law and the District Mission Statement. It is the guiding document for program and capital facilities management and provides context and purpose to near-term choices, and assesses the future consequences of those choices.

Tasks under this activity involve maintaining and updating the District Comprehensive Plan required under the Watershed Act (103D) and the Metropolitan Water Management Act (103B), and the District Storm Water Pollution Prevention Plan (SWPPP) which serves as the District NPDES permit under the federal Clean Water Act.

The District reviews and either comments or approves a variety of local water planning efforts:

Local Water Plan: Required by the Metropolitan Water Management Act (must be consistent with the Watershed District Comprehensive Plan).

Stormwater Management Plan: Stormwater chapter required as part of the City Comprehensive plan.

Stormwater Pollution Prevention Plan (SWPPP): Required by the NPDES program under the federal Clean Water Act.

Nondegradation/Water Quality Plan: Required under the NPDES program under the federal Clean Water Act.

This activity models the hydrology of surface water flows within the watershed to provide an accurate simulation of District hydrology and water quality for assessing and determining management needs and actions. The activity also involves assessing the overall hydrology of the Watershed to gain insight into factors affecting surficial ground water levels and the amount of water lost to potential evapotranspiration (PET).

PLANNING, PROGRAMMING, & BUDGETING Policy and Procedures

The policy and procedures manual is intended to provide guidance, continuity, and consistency in District operations and activities. The manual is the principal source of specialized guidance and instruction for carrying out the direction issued in the program handbook. The manual may include significant procedural direction.

The program manual provides guidance, continuity, and consistency in District operations and activities. It contains the legal authorities, objectives, policies, responsibilities, instructions and guidance needed on a continuing basis by District staff to plan and implement assigned programs and activities.

PLANNING, PROGRAMMING & BUDGETING Electronic Ditch Profiles

Description

Electronic media is rapidly becoming the standard of design and planning through GIS and CAD. All of the public ditch data need to be converted to electronic format. Plan sets are registered to CAD and GIS with current elevations and airphotos. Plan sets not reviewed and approved by DNR would be submitted. This is a 5-year program coordinated with our NPDES inspection requirements.

| | 2008 | 2009 | 2010 | 2011 | 2012 |
|-------|------|----------------------|----------------------|----------------------|----------------------------------|

| | | | | | |

| Implications of Recent | Planning Trends for the Management of the Watershed |
|--|---|
| Trend | Implications |
| Increasing need to detail budget and work plan | State audit requirements have become more detailed and more stringent requiring increased detail in documenting the District budget, needs and expenditures. |
| Increasing complexity in water quality regulations | MPCA is currently involved in at least seven efforts which will have regulatory requirements for the District. These efforts do not include any impairments or subsequent TMDLs which currently exist or may occur in the future. |
| Increasing focus on Groundwater | In addition to water quality, many issues appear to have their origin in groundwater. |

| Expectations about the future Planning of the Watershed (2010 to 2012) | | | | |
|--|---|--|--|--|
| Expectations | Explanation | | | |
| Conflict with MPCA | The current trend and emphasis on water quality does not take into account the impact of the drought nor the effect of the decline in groundwater on surface waters of the District. The District could continue to be held accountable for not achieving water quality standards for turbidity, TSS, and potentially DO when the root of the problem is decreased and declining flows. | | | |
| Audits could take longer to complete or at least require more staff time in a shorter period | Audit standards appear to change annually which affects the reporting and formatting of District records provided for analysis and reporting. | | | |

| Immediate Needs (2010 – 2011) | | |

{Intentionally Blank}

PUBLIC AND GOVERNMENTAL RELATIONS

PROGRAM DESCRIPTION

The purpose of the public and governmental relation program is to ensure that the continuing planning and management of the Coon Creek watershed is responsive to the needs and concerns of an informed public and to coordinate policies and programs of the local, state, and federal government agencies to achieve consistency with the plan.

A program consisting of three activities has been developed to carry out District policies. The components are:

- 1. Education
- 2. Information
- 3. Involvement

In practice, overlap will occur among these three components; all information is educational in nature, and education requires involvement.

Great Coon Creek Clean Up event, Blaine/Ham Lake Rotary Club, October 2009

Jefferson Elementary students at Metro Children's Water Festival, September 2009

Major needs of the District are: greater public awareness of watershed water resources, appropriate use of water resources and the issues and conflicts that arise when managing those resources. Increasing awareness is the first step in enhancing public commitment to sound natural resource management. The District also makes several presentations each year to students and civic organizations. These presentations focus on water resources, the establishment of the District, its purposes and policies, and issues facing the watershed. The response from these groups has been more positive since the discussion was redirected from a scientific evaluation of District issues to a more policy-oriented approach.

District education activities involve:

| Measures | 2008 | 2009 | 2010 | 2011 | 2012 |
|-------------------------|------------------|------------------|------|------|------|

Erosion Control workshop, Savannah Grove, Blaine; May 28, 2009

Public information is essential in any public capital or regulatory program. It is also a prerequisite to both public education and public involvement. To be able to participate and to sense when that participation will be most effective, individuals must first know the issues and the decisions to be made.

| Implications of Recent Public & Governmental Relations Trends for the Management of the Watershed (2010 to 2012) | | | | |
|--|--|--|--|--|
| Trend | Implications | | | |
| Decreased number of city newsletter per year | As a method to reduce budgets, cities have reduced the number of printed issues. Therefore, less space is available for items outside of city news, and those submitted need to be very short making it is increasingly difficult to communicate complex issues. | | | |
| Increased number of conferences & Workshops | As a result of the potential TMDL listing of Sand and Coon Creeks for chlorides, training workshops are recommended for city and contractor | | | |

road crews, and for city managers. Trainings have been developed by

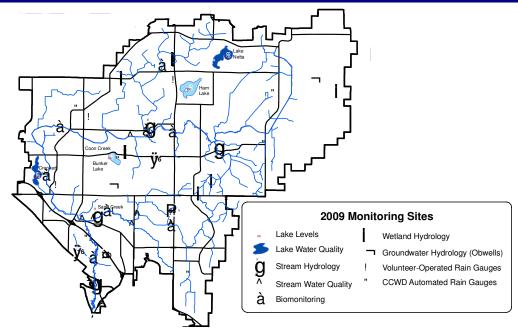

| Training of the Public Works audience | MNDOT and UMN Extension that have proven results in reducing road salt application. |
|---------------------------------------|---|
| Website updates more complex | The trend in education is to use increased graphics to convey information; webmapping and multimedia products such as YouTube video and slideshows embedded into websites are becoming common education and training tools. |

| Expectations | Explanation |
|--|---|
| More Outreach Events | CCWD is getting known as an educational resource on water issues including presentations and community service opportunities, and providing grant support for producing events such as Green Expos and school water festivals. |
| Increased number of training workshops | Through an EPA 319 grant to reduce stormwater pollutants, the UMN Extension is providing cost-share opportunities for training workshops. Increased time is needed for organizing best management practice training workshops for municipal public works and city council/staff. |
| Emphasis on graphics and mobile-enhanced information | As the culture becomes more used to cell phones as information conveyances, more information may need to be mobile—enhanced. By end of 2012, videos could expand into trainings on construction BMPs such as proper erosion control that could be viewed in the field on a mobile "smartphone." |

| Immediate Needs (2010 – 2011) | | | | | | | |
|--|--|--|--|--|--|--|--|
| Explanation | | | | | | | |
| Coordinate with UMN Extension-Stormwater U/NEMO on their EPA | | | | | | | |
| 319 grants for Road Salt and summer turf trainings for municipal staff | | | | | | | |
| and managers. Expected contribution is \$250-500 each workshop. | | | | | | | |
| As opportunities for written communication decrease, the ease and | | | | | | | |
| popularity of short videos for the web and outreach events increases. | | | | | | | |
| Collaborating with 2 local community-access cable stations has already | | | | | | | |
| resulted in 2 PSAs in 2010, one produced internally: winter de-icing | | | | | | | |
| tips, & the other: groundwater recharge tips for homeowners. | | | | | | | |

RESEARCH, MONITORING, & DATA COLLECTION

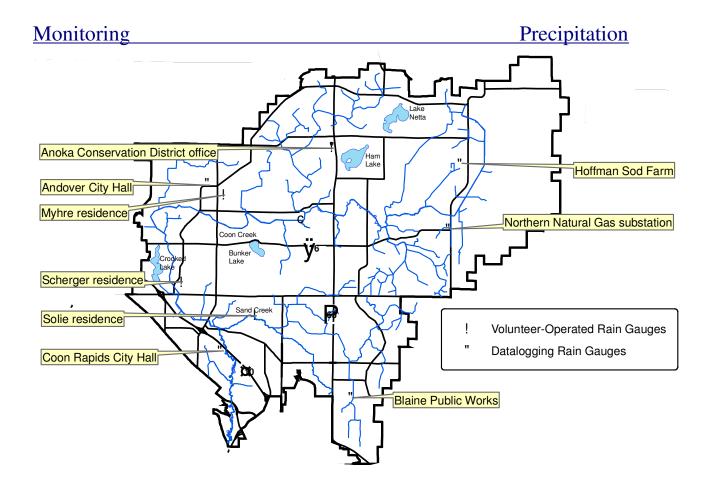

PROGRAM DESCRIPTION

The purpose of the research, monitoring and data collection program is to gather and analyze data that will result in increased efficiency and effectiveness of watershed management and District programs. Most of the data that is presented in this section of the annual report and plan is drawn from "2009 Anoka Water Almanac: Water Quality and Quantity Conditions in Anoka County, MN," prepared by the Anoka Conservation District.

The research, monitoring, and data collection program provides integrated resource information used in planning, evaluating, and decision-making within the Coon Creek Watershed District. Program activities include:

- 1. Precipitation Monitoring
- 2. Stream
 - a. Hydrology
 - b. Water quality
 - c. Biology
- 3. Lakes
 - a. Hydrology
 - b. Water quality
- 4. Wetlands
 - a. Hydrology
 - b. Biology/Vegetation

District planning, regulation, and project decision-making depend upon scientifically credible and accurate resource information. This data allows resource managers to make scientifically based management decisions. These are all essential to effective resource management.

This activity involves continuous monitoring of precipitation with both data-logging rain gauges and non-logging rain gauges that are read daily by volunteers. Rain gauges are placed around the watershed in recognition that rainfall totals and storm phenology vary over distance, and these differences are critical to understanding local hydrology including predicting flooding.

Monitoring Biomonitoring

Description

In 2009 the District monitored six locations within the watershed. The effort, coordinated by the Anoka Conservation District, assessed stream health using benthic (bottom-dwelling) macroinvertebrates. Certain macroinvertebrates, such as mayflies, stoneflies, and caddisflies, require high quality streams while others such as midges thrive in poor quality streams. Because of their extended exposure to stream conditions and sensitivity to habitat and water quality, these macroinvertebrates can serve as good indicators of stream health.

The Minnesota Pollution Control Agency (MPCA) has listed Coon Creek as biologically impaired based on single samples taken from two sites in August 2000. Both of these reaches are actively maintained ditches that had been recently cleaned. The purpose of this work is to:

- compare maintained and unmaintained creek reaches
- compare the Coon Creek system with similar nearby streams
- examine the effect of total suspended solids on invertebrate communities
- verify the MPCA findings.

Biomonitoring Results

| Locations | Status | 2008 | 2009 | 2010 | 2011 | 2012 |

Summary

The data used in this study are limited in several ways and therefore the results should be interpreted with caution. Limitations include the length of the study (2 years), the small number of sampling sites, changes in sampling sites across years, and the statistical nonindependence of different sampling sites located within the same stream or ditch. However, both 2008 and 2009 data support of the following general conclusions:

- Total number of families, FBI, and EPT indices of stream health are not different among unmaintained reaches of stream and those that have been maintained (ditched or cleaned) in the last 10 years.
- Coon Creek sites monitored by the MPCA and used to designate the creek as "biologically impaired" have biological indices of stream health that are in the middle of the range of the seven other streams that were monitored throughout Anoka County in 2009 and other years (includes student-monitored sites).
- There does not appear to be any strong correlations between TSS and any of the invertebrate indices, suggesting that TSS is not a strong predictor of macroinvertebrate community health in these systems.
- Unmaintained sites have slightly higher values of overall MSHA score, land use, substrate, and channel morphology scores, and lower turbidity values. All of these observations are consistent with better stream conditions, but the differences are not dramatic and there is inconsistency amongst years.
- The relationships between overall MSHA score and the three biotic indices suggested that only FBI was correlated with overall MSHA score.
- In 2008 and 2009 poorer invertebrate communities were found than by the MPCA in 2000 at the two Coon Creek sites designated as impaired (Highway 65 and Egret St.). The Highway 65 site (maintained) had poorer biotic indices of stream health than the Egret Street site (not maintained).
- There is notable variability in biological survey results among samplings. This has been observed by both professional and student long-term biomonitoring.

Monitoring Lake Level

Lake Levels 2005-2009

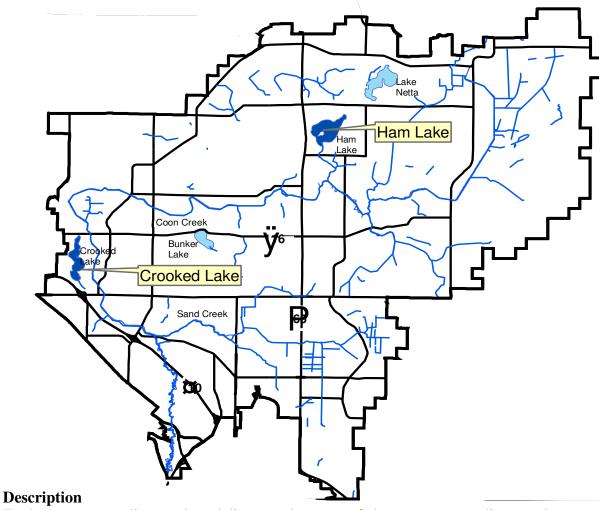

Description

Long-term monitoring of lake levels is useful for regulatory decision making, development decisions, lake management decisions and investigation into possible causes of various impacts to lakes. The lakes are monitored using an enamel gauge that is surveyed into each lake so that readings coincide with mean sea level elevations. The gauges are read weekly and reported to the DNR by the Anoka Conservation District. The data is available on the DNR website, www.dnr.mn.us.state\lakefind\index.html.

| Lake | 2008 | 2009 | 2010 | 2011 | 2012 |

Coon Creek Watershed Lake Levels Summary 2005-2009

| Lake | Year | Average | Min | Max |
|---------|------|---------|--------|--------|
| Bunker | 2005 | 881.33 | 880.94 | 881.50 |
| | 2006 | 881.45 | 880.75 | 882.31 |
| | 2007 | 880.39 | 878.95 | 881.77 |
| | 2008 | 880.41 | 879.57 | 881.66 |
| | 2009 | 879.52 | 878.79 | 880.37 |
| Crooked | 2005 | 860.23 | 859.68 | 860.51 |
| | 2006 | 860.54 | 860.10 | 860.92 |
| | 2007 | 860.35 | 859.68 | 860.86 |
| | 2008 | 860.75 | 859.96 | 861.24 |
| | 2009 | 859.47 | 859.14 | 859.90 |
| Ham | 2005 | 895.85 | 895.37 | 896.26 |
| | 2006 | 896.48 | 896.07 | 896.89 |
| | 2007 | 896.49 | 895.99 | 896.78 |
| | 2008 | 895.75 | 895.29 | 896.83 |
| | 2009 | 894.80 | 894.30 | 895.22 |
| Netta | 2005 | 901.36 | 900.76 | 901.72 |
| | 2006 | 902.05 | 901.76 | 902.46 |
| | 2007 | 901.17 | 900.49 | 902.07 |
| | 2008 | 901.32 | 900.63 | 902.19 |
| | 2009 | 900.15 | 899.84 | 900.58 |

To detect water quality trends and diagnose the cause of changes water quality samples are taken May through September twice-monthly. The samples are analyzed for the following parameters: total phosphorus, chlorophyll-a, Secchi transparency, dissolved oxygen, turbidity, temperature, conductivity, pH, and salinity. Detailed data for each lake are provided in the Anoka Water Almanac prepared by the Anoka Conservation District including summaries of historical conditions and trend analysis. Previous years' data are available from the ACD.

Lake monitoring has followed the following schedule:

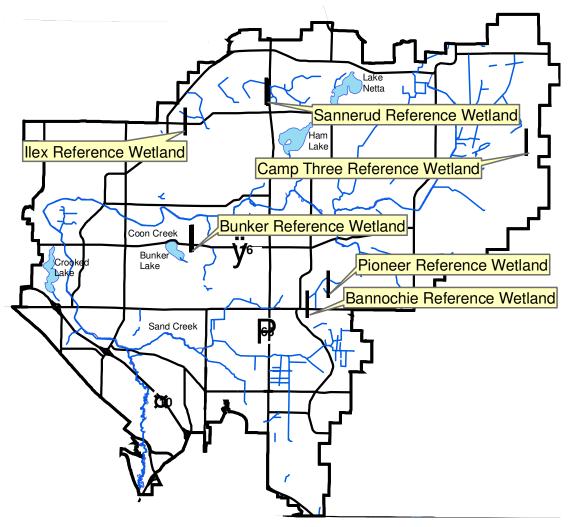

| | 2008 | 2009 | 2010 | 2011 | 2012 |
|---------|------|------|------|------|------|

Description

This program is to provide understanding of wetland hydrology, including the impact of climate and land use. These data aid in delineation of nearby wetlands by documenting hydrologic trends including the timing, frequency, and duration of saturation. Continuous groundwater level monitoring at a wetland boundary to a depth of 40 inches is done. District-wide, the ACD maintains a network of six wetland hydrology monitoring stations.

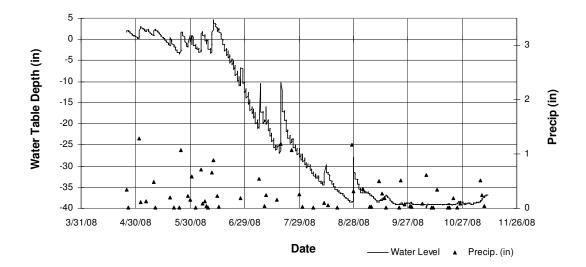

The purpose of reference wetland data is to help assure that wetlands are accurately identified by regulatory personnel. State and federal laws place restrictions on filling, excavation and other activities in wetlands. Commonly, citizens wish to do work in an area that is sometimes, or perhaps only rarely, wet. Whether this area is a wetland under regulatory definitions is often in dispute. Complicating the issue is that conditions in wetlands are constantly changing—an area that is very wet and clearly wetland at one time may be completely dry only a few weeks later (dramatically displayed in the graphs). As a result, regulatory personnel look at a variety of factors including soils, vegetation, and current moisture conditions. Reference wetland data provide a benchmark for comparing moisture

conditions in a disputed area to known wetlands, thereby helping assure accurate regulatory decisions. The analysis of reference wetland data provided above is a quantitative, nonsubjective tool.

The simplest use of the reference wetland data is to compare water levels in the reference wetlands to water levels in a disputed area. The graphics and tables below are based upon percentiles of the water levels experienced at known wetland boundaries. The quartile boxes in the figures delineate the 10th, 25th, 50th, 75th, and 90th percentiles. Water table depths outside of the box have a low likelihood of occurring or may only occur under extreme circumstances such as extreme climate conditions or in the presence of anthropogenic hydrologic alterations. If sub-surface water levels in a disputed area are similar to those in reference wetlands, there is a high likelihood that the disputed area is a wetland.

This approach can be refined by examining data from only the year of interest and only certain wetland types. This removes much of the variation that is due to climatic variation among years and due to wetland type. Substantial variation in water levels will no doubt remain among wetlands even after these factors are accounted for, but this exercise should provide a reasonable framework for understanding what hydrologic conditions were present in known wetlands during a given time period.

Water table levels are recorded every 4 hours at all 19 reference wetlands (except during winter) and the raw water level data available through the Data Access tool at: www.AnokaNaturalResources.com.

| Implications of Recent | Monitoring Trends for the Management of the Watershed |
|-------------------------------|--|
| Trend | Implications |
| Decreases in precipitation | Decrease in flows and water quality, increased exceedances of state water quality standards. |
| Increased frequency of rain | Decreased infiltration |
| events greater than 1 inch | Undersized infrastructure |
| | Increased loadings of Phosphorus and Total Suspended Solids (TSS). |
| Decreases in Lake Levels | Increases in phosphorus levels and algae. |
| Increase in flashiness of | Increases in turbidity and TSS in lower creek. General decrease in |
| lower portions of system | water quality. |
| Decreases in water quality | Increased need for retrofit projects. |
| in older developed portions | |
| of watershed | |

| Expectations about the future Monitoring of the Watershed (2010 to 2012) | | | | | | | | |
|---|--|--|--|--|--|--|--|--|
| Expectations | Explanation | | | | | | | |
| Continued decreases in precipitation | Decreases in precipitation will contribute to water scarcity and water shortages throughout the District. | | | | | | | |
| Continued high intensity, short duration storms | Downbursts over smaller areas flush areas with enough water to suspend sediment, contribute to turbid condition and create peak flows which can have an erosive impact on stream channels. | | | | | | | |
| Increased "Impaired" Designations | The District historical focus has been on flood control requiring that the lower portion of the watershed discharge prior to the peak flow arrival from upstream. This strategy in turn has created a "flash flush" which is contributing to (or causing) loading of both dissolved pollutants such as Chloride, but is contributing to high turbidity levels and TSS as well. | | | | | | | |

| Immediate Needs (2010 | Immediate Needs (2010 – 2011) | | | | | | | | |
|-------------------------------|---|--|--|--|--|--|--|--|--|
| Need | Explanation | | | | | | | | |
| Focus on retrofit efforts in | The District has completed one "retrofit" study through the Anoka | | | | | | | | |
| the lower portion of the | Conservation District (Sand Creek). In 2010 the District plans to assess | | | | | | | | |
| watershed to reduce volume, | the lower part of the Coon Creek Watershed (Coon Rapids). This effort | | | | | | | | |
| Phosphorus loading, and | needs to continue until the issues of volume, turbidity, phosphorus | | | | | | | | |
| TSS | loading, and TSS in the lower Creek are addressed. | | | | | | | | |
| | | | | | | | | | |
| Encourage water | Two efforts should be considered: | | | | | | | | |
| conservation and infiltration | 1) Public education to conserve beyond watering restrictions (eg, | | | | | | | | |
| throughout the District | aeration to encourage infiltration). | | | | | | | | |
| | | | | | | | | | |
| | 2) Use of 'Culvert Boarding' on high infiltration (losing reaches) of the | | | | | | | | |
| | public ditch system throughout the watershed. | | | | | | | | |
| | | | | | | | | | |

{Intentionally Blank}

District Performance

Introduction

In the 2003 Budget and Plan, the District committed to delivering a range of water resource based benefits to the citizens of the watershed in a manner consistent with the District Comprehensive Plan. The goals of the Comprehensive Plan are:

- Goal 1: To protect, preserve, and use natural surface and ground water storage and retention systems
- Goal 2: To minimize public capital expenditures needed to correct flooding and water quality problems
- Goal 3: To identify and plan for means to effectively protect and improve surface and groundwater quality
- Goal 4: To establish uniform local policies and controls for surface and groundwater management
- **Goal 5:** To prevent soil erosion into surface water systems
- **Goal 6:** To promote groundwater recharge
- Goal 7: To protect and enhance fish and wildlife habitat and water recreational facilities
- Goal 8: To secure the other benefits associated with the proper management of surface and groundwater
- Goal 9: To conserve natural resources through land use planning, flood control, and conservation projects
- Goal 10: To use sound scientific principals for the protection of public health and welfare and the provident use of natural resources
- Goal 11: To ensure that the continued planning and management of the Coon Creek Watershed District is responsive to the needs and concerns of an informed public

Goal 1: Protect, preserve, and use the natural surface & groundwater storage and retention system

Objective 1.1: Maintain ditch and conveyance systems

Long Term Outcome Measures: Trends in agricultural drainage and flooding

| Strategy/Program | Activities/BMPs | Outputs | 2006 | 2007 | 2008 | 2009 |

Objective 9.1: To protect the health and safety of the present and future people that live within the watershed

Long Term Outcome Measures:

| Strategy/Program | Activities/BMPs | Outputs | 2006 | 2007 | 2008 | 2009 |
|-----------------------------------|---|---|------|------|------|------|
| Land & Water Regu | lation | | | | | |
| Environmental | Environmental | Number of | 10 | 3 | 9 | 1 |
| Review | Review | Environmental | | | | |
| | | reviews occurring | | | | |
| Issues and | Emergency Work | Number of | 1 | 1 | 1 | 0 |
| Complaints | | emergency actions authorized | | | | |
| | Issues | Number of issues | 80 | 77 | 75 | 101 |
| Permit Inspection and Enforcement | Permits | Number of Permits | 46 | 18 | 28 | 24 |
| Permit Review | Best Management Practices (BMPs) | Number of BMPs | 138 | 75 | 107 | 180 |
| | Permit Review & Findings | Number of permit application reviewed | 147 | 106 | 179 | 115 |
| | Regulations and Performance Standards | Continued performance and improvement of the complete water resource system | Yes | Yes | Yes | Yes |
| Operations & Maint | tenance | | | | | |
| Repair | Ditch Repair | Number of projects | 4 | 3 | 11 | |
| Planning | | | | | | |
| Comprehensive Planning | Comprehensive Plan | Comprehensive Plan (Up Date) | Yes | Yes | Yes | Yes |
| Public and Governm | nental Relations | | | | | |
| Involvement | Issue Management Hotline | Number of issues | 83 | 77 | 74 | 100 |
| Research | | | | | | |
| Inspections | Ditch Inspection | Number of inspections | 4 | 2 | 2 | 3 |

| | 2006 | 2007 | 2008 | 2009 |
|---------|----------|----------|-----------|----------|
| Funding | \$29,386 | \$41,680 | \$105,370 | \$58,426 |
| FTEs | . 7 | .6 | 1.3 | 0.7 |

Objective 9.2: To provide for opportunities and uses of water and related natural resources of the watershed which are demanded and appropriate for the area

Long Term Outcome Measures:

| Strategy/Program | Activities/BMPs | Outputs | 2006 | 2007 | 2008 | 2009 |
|---------------------------|---|---|------|------|------|------|
| Land & Water Regu | lation | | | | | |
| Permit Review | Regulations and Performance Standards | Continued performance and improvement of the complete water resource system | Yes | Yes | Yes | Yes |
| Planning | | | | | | |
| Comprehensive Planning | Comprehensive Plan | Comprehensive Plan (Up Date) | Yes | Yes | Yes | Yes |
| | Differentiate Role | Comprehensive Plan - Stream Order map | Yes | Yes | Yes | Yes |
| Public and Governm | nental Relations | | | | | |
| Involvement | Comprehensive Plan Development | Number of Workshops/Reviews | 1 | 4 | 6 | 0 |
| | Coordination with Local and County Government | Number of TAC meetings | 23 | 14 | 20 | 36 |
| | Hearings | Number of Hearings | 2 | 4 | 3 | 3 |
| | Local Water Plan Review and Approval | Number of Local Plans reviewed | 1 | 9 | 9 | 6 |
| | Plan & Permit Coordination | Number of TEP meetings | 18 | 17 | 23 | 34 |
| | Stakeholder Meeting | Number of Meetings | 13 | 138 | 48 | |

| | 2006 | 2007 | 2008 | 2009 |
|---------|----------|----------|----------|----------|
| Funding | \$15,225 | \$14,016 | \$34,740 | \$28,093 |
| FTEs | .2 | .1 | .3 | 0.3 |

Objective 9.3: To prevent unacceptable damage to the water and related natural resources of the watershed

Long Term Outcome Measures:

| Strategy/Program | Activities/BMPs | Outputs | 2006 | 2007 | 2008 | 2009 | | |
|-------------------------|------------------|----------------------|------|------|------|------|--|--|
| Land & Water Regulation | | | | | | | | |
| Environmental | Environmental | Number of | 10 | 3 | 9 | 1 | | |
| Review | Review | Environmental | | | | | | |
| | | reviews occurring | | | | | | |
| Permit Inspection | Inspections | Number of | 147 | 84 | 126 | 194 | | |

| | Permits | Number of Permits | 46 | 18 | 28 | 24 | | |
| Permit Review | Best Management | Number of BMPs | 138 | 75 | 107 | 180 | | |
| | Practices (BMPs) | | | | | | | |
| | Board Review and | Number of permit | 119 | 86 | 67 | 44 | | |
| | Action | reviews by Board | | | | | | |
| | Conservation | Number of easements | 283 | 50 | 32 | 0 | | |
| | Easements | dedicated | | | | | | |
| | Permit Review & | Number of permit | 147 | 106 | 179 | 115 | | |
| | Findings | application reviewed | | | | | | |
| | Regulations and | Continued | Yes | Yes | Yes | Yes | | |
| | Performance | performance and | | | | | | |
| | Standards | improvement of the | | | | | | |
| | | complete water | | | | | | |
| | | resource system | | | | | | |

| | 2006 | 2007 | 2008 | 2009 |
|---------|----------|----------|----------|----------|
| Funding | \$54,889 | \$54,114 | \$66,847 | \$57,441 |
| FTEs | 1.53 | .74 | .9 | 0.8 |

Goal 10: To use sound scientific principals for the protection of public health and welfare, and the provident use of natural resources

Objective 10.1: To monitor the hydrology of Coon Creek and key water resources

Long Term Outcome Measures:

| Strategy/Program | Activities/BMPs | Outputs | 2006 | 2007 | 2008 | 2009 |
|------------------|-------------------|---|------|------|------|------|
| Research | | | | | | |
| Monitoring | Infiltration Rate | Report on infiltration rates in established infiltration basins on varying soil types | Yes | Yes | Yes | Yes |
| | Lake Level | Water Atlas report on trends in lake level elevations | Yes | Yes | Yes | Yes |
| | Precipitation | Water Atlas report on precipitation amounts, frequency and distribution | Yes | Yes | Yes | Yes |
| | Stream Level | Water Atlas report on annual hydrographs and peak elevations for various locations within the watershed | Yes | Yes | Yes | Yes |
| | Wetland Hydrology | Water Atlas report on wetland hydrology | Yes | Yes | Yes | Yes |

| | | 2006 | 2007 | 2008 | 2009 |
|---------|---|----------|----------|----------|----------|
| Funding | 5 | \$11,620 | \$20,185 | \$20,185 | \$13,020 |
| FTEs | | .07 | .6 | .6 | 0.0 |

Objective 10.2: To model updated hydrologic and hydraulic data

Long Term Outcome Measures:

| Strategy/Program | Activities/BMPs | Outputs | 2006 | 2007 | 2008 | 2009 |
|------------------|-----------------|-----------------------------|------|------|------|------|
| Research | | | | | | |
| Modeling | HydroCAD | Convert HydroCAD to XPSWMMM | Yes | Yes | Yes | Yes |
| | Water Budget | Updated Budget | Yes | Yes | Yes | Yes |

Means & Associated Resources

| | 2006 | 2007 | 2008 | 2009 |
|---------|---------|----------|----------|------|
| Funding | \$4,579 | \$13,000 | \$13,000 | \$0 |
| FTEs | .04 | .13 | .13 | 0.0 |

Objective 10.3: To monitor the water quality of Coon Creek and key water resources

Long Term Outcome Measures:

| Strategy/Program | Activities/BMPs | Outputs | 2006 | 2007 | 2008 | 2009 |
|------------------|-----------------------------------|---|------|------|------|------|
| Research | | | | | | |
| Monitoring | Lake Water Quality | Water Atlas report on lake water quality trends | Yes | Yes | Yes | Yes |
| | Lower Coon Creek Water Quality | Water Atlas report on Stream water quality trends | Yes | Yes | Yes | Yes |

| | 2006 | 2007 | 2008 | 2009 |
|---------|---------|---------|---------|---------|
| Funding | \$2,650 | \$5,540 | \$5,540 | \$9,548 |
| FTEs | .01 | .2 | .2 | 0.0 |

Goal 11: To ensure that the continued planning and management of Coon Creek Watershed District is responsive to the needs and concerns of an informed public

Objective 11.1: To provide information to the public and to decision makers Long Term Outcome Measures:

| Strategy/Program | Activities/BMPs | Outputs | 2006 | 2007 | 2008 | 2009 |
|---------------------------|--|---|------|------|------|------|
| Land & Water Regu | | | | | | |
| Environmental Review | Environmental Review | Number of Environmental reviews occurring | 10 | 3 | 9 | 1 |
| Permit Review | Notice of Decision and Status of Application | Number of Decision Notices prepared | 203 | 101 | 209 | 105 |
| Public and Governm | | | | | | |
| Information | Developer's Handbook: Principles and Standards | Development of Application packet and Handbook | 0 | 1 | 0 | 0 |
| | Low Impact Development | Number of Drainage Sensitive/ Low impact developments reviewed | 24 | 17 | 5 | 3 |
| | Model Ordinance Principles/Standards | Number of Ordinances adopted | 1 | 1 | 0 | 0 |
| | Pre-application Conferences/Land Owner Contacts | Number of pre- application conferences | 41 | 29 | 19 | 18 |
| | Watershed District Rules and Standards | | Yes | Yes | Yes | Yes |
| Involvement | Advisory Committees | Number of meetings | 6 | 6 | 9 | 3 |
| | Agenda Distribution | Number on distribution list | 41 | 43 | 45 | 56 |
| | Comprehensive Plan Development | Number of Workshops/Reviews | 1 | 4 | 6 | 0 |
| | Open Mike | Number of open mike presentations | 2 | 0 | 0 | 1 |
| | Regular Meetings | Number of Meeting per year | 23 | 20 | 22 | 22 |
| | Stakeholder Meeting | Number of Meetings | 13 | 138 | 48 | |

| | 2006 | 2007 | 2008 | 2009 |
|---------|----------|----------|----------|----------|
| Funding | \$35,608 | \$46,394 | \$65,201 | \$40,097 |
| FTEs | .6 | .5 | .7 | .4 |

Objective 11.2: Coordinate the policies, plans, programs, and regulations of all state and local agencies are consistent with the comprehensive management plan

Long Term Outcome Measures:

| Strategy/Program | Activities/BMPs | Outputs | 2006 | 2007 | 2008 | 2009 |
|---------------------------|---------------------|-----------------|------|------|------|------|
| Public and Governn | nental Relations | | | | | |
| Involvement | Coordination with | Number of TAC | 23 | 14 | 20 | 2 |
| | Local and County | | | | | |
| | Government | | | | | |
| | Local Water Plan | Number of Local | 1 | 1 | 9 | 6 |
| | Review and Approval | Plans reviewed | | | | |
| | Plan & Permit | Number of TEP | 18 | 17 | 23 | 34 |
| | Coordination | meetings | | | | |

Means & Associated Resources

| | 2006 | 2007 | 2008 | 2009 |
|---------|----------|---------|----------|----------|
| Funding | \$11,854 | \$7,770 | \$11,232 | \$15,862 |
| FTEs | .16 | .08 | .10 | .2 |

Objective 11.3: To ensure that the key issues are identified and that acceptable solutions are included in the plan

Long Term Outcome Measures:

| Strategy/Program | Activities/BMPs | Outputs | 2006 | 2007 | 2008 | 2009 | | |
|--|---|--|----------|------|------|------|--|--|
| | Land & Water Regulation | | | | | | | |
| Permit Review | Board Review and Action | Number of permit reviews by Board | 119 | 86 | 67 | 44 | | |
| Planning | | | <u> </u> | | | | | |
| Annual Assessment, Reporting and Planning | Annual Report and Plan | Board review and adoption; Submittal to BWSR | Yes | Yes | Yes | Yes | | |
| Budgeting and Program Planning | Annual Priorities | Budget goals and themes | Yes | Yes | Yes | Yes | | |
| Public and Governm | nental Relations | | | | | | | |
| Involvement | Annual Open House Meeting | Completed meeting and attendance | Yes | Yes | Yes | Yes | | |
| | Coordination with Local and County Government | Number of TAC | 23 | 14 | 20 | 36 | | |

| | 2006 | 2007 | 2008 | 2009 |
|---------|----------|----------|----------|----------|
| Funding | \$27,333 | \$35,872 | \$40,792 | \$27,078 |
| FTEs | .6 | .4 | .4 | 0.3 |

Objective 11.4: To provide for active involvement of the public and related units of government in developing and implementing water management plans and activities

Long Term Outcome Measures:

| Strategy/Program | Activities/BMPs | Outputs | 2006 | 2007 | 2008 | 2009 |
|------------------------------|------------------|---------------------|------|------|------|------|
| Public and Government | nental Relations | | | | | |
