

Use Pesticides Wisely!

Pesticides

Pesticides include insecticides, herbicides and fungicides. Always try to use non-chemical forms of pesticides first. If you decide to use chemical pesticides (organic or synthetic) follow the tips listed below.

Pesticide Use Tips:

Always read & follow the label

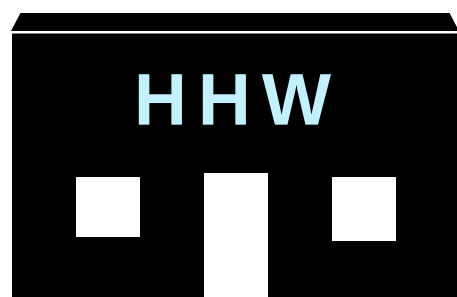

Target your use to specific issues

Buy only what you need & use it up!

Don't apply if windy or rain is predicted

Store excess pesticides so they don't freeze or lose their labels. Take old, frozen, or unlabeled pesticides to your local Household Hazardous Waste (HHW) Facility
